Who we are

Our team of doctors came together with a common goal: to use our expertise in medicine to help the most vulnerable populations. We saw too much suffering and distress caused by hunger and war, and we knew we had to act.

This is how we decided to create a philanthropic cryptocurrency, a new investment approach that combines financial benefits and humanitarian contribution. By investing in our cryptocurrency, donors can not only expect a return on their investment, but also support humanitarian projects that fight hunger and violence around the world.

Our vision

Our vision is to create a virtuous circle where investors can make profits while contributing to a positive social impact. By supporting initiatives such as emergency food programs and post-conflict reconstruction projects, we hope to bring tangible and lasting change to the lives of people affected by these crises.

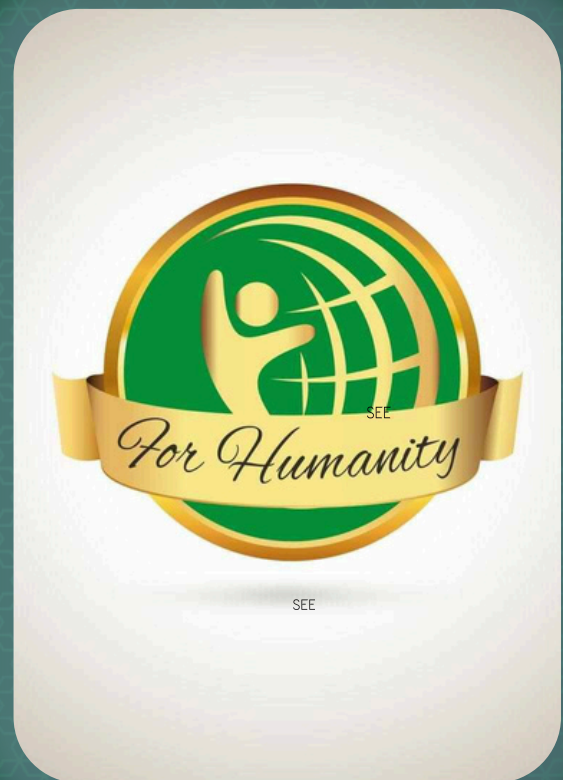

We firmly believe that every individual deserves to live with dignity and security. By joining forces as doctors and humanitarians, we are determined to use our expertise to create a fairer and more equitable world for all.

We invite all who share our vision to join us in this noble cause. With your support, we can make a real difference and help build a better future for future generations. We are doctors, and it is our humanity that pushes us to act.

FHT

For Humanity Token (FHT) is a cryptocurrency created by experts in the world of blockchain. Unlike many other cryptocurrencies, the main purpose of FHT is to support philanthropic and humanitarian projects around the world.

In addition to supporting humanitarian projects, FHT also provides benefits to token holders. Users can participate in staking programs to earn rewards in the form of additional FHT tokens, which encourages community participation and long-term holding of the cryptocurrency.

Advantage of sending funds without an intermediary.

For Humanity is a philanthropic cryptocurrency created with the aim of promoting balance between investors and beneficiaries.

By investing in For Humanity, users have the opportunity to diversify their portfolio while contributing to philanthropic actions. Indeed, part of the profits generated by Transactions made with our cryptocurrency are donated to humanitarian organizations and social projects.

We have established a unique mechanism that aims to support charitable initiatives while providing a profitable investment opportunity for our token holders.

During each exchange of FHT tokens, a 1% tax is levied, this tax is automatically reserved for redistribution to charitable organizations. This allocation of funds ensures that each transaction contributes to important humanitarian causes and helps bring positive change to the world.

10% of the Supply will be distributed gradually to support our charitable projects.

SEE

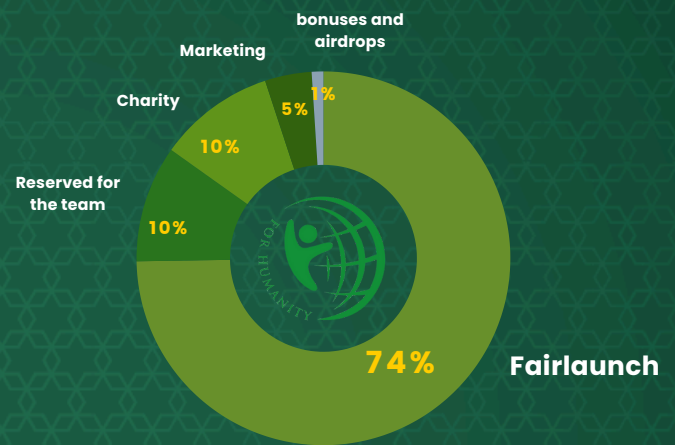

Our project's tokenomics has been carefully designed to ensure the sustainability and long-term growth of our cryptocurrency, while placing social responsibility at the heart of our mission.

Tokenomics

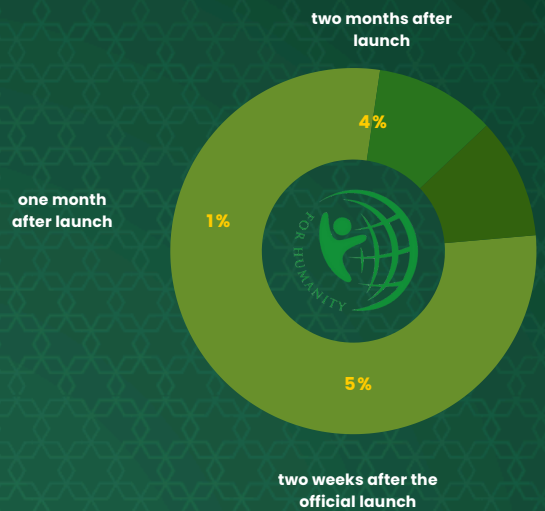

The distribution of FHT tokens is as follows:

- 74% Fairlaunch
- 10% reserved for the team for financing developers, premises, international travel and all necessary logistics
- 10% dedicated to charity
- 5% allocated to marketing
- 1% allocated to bonuses and airdrops.

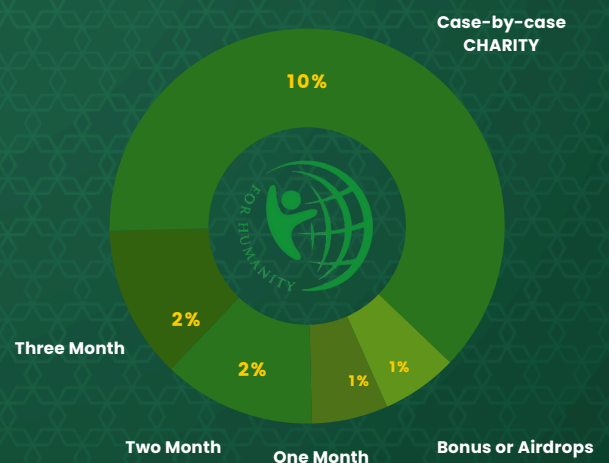

The token distribution program takes place as follows:

- Teams from a progressive acquisition of tokens:
- 5% will be allocated two weeks after the official launch,
- 1% will be allocated one month after launch,
- 4% will be allocated two months after launch.

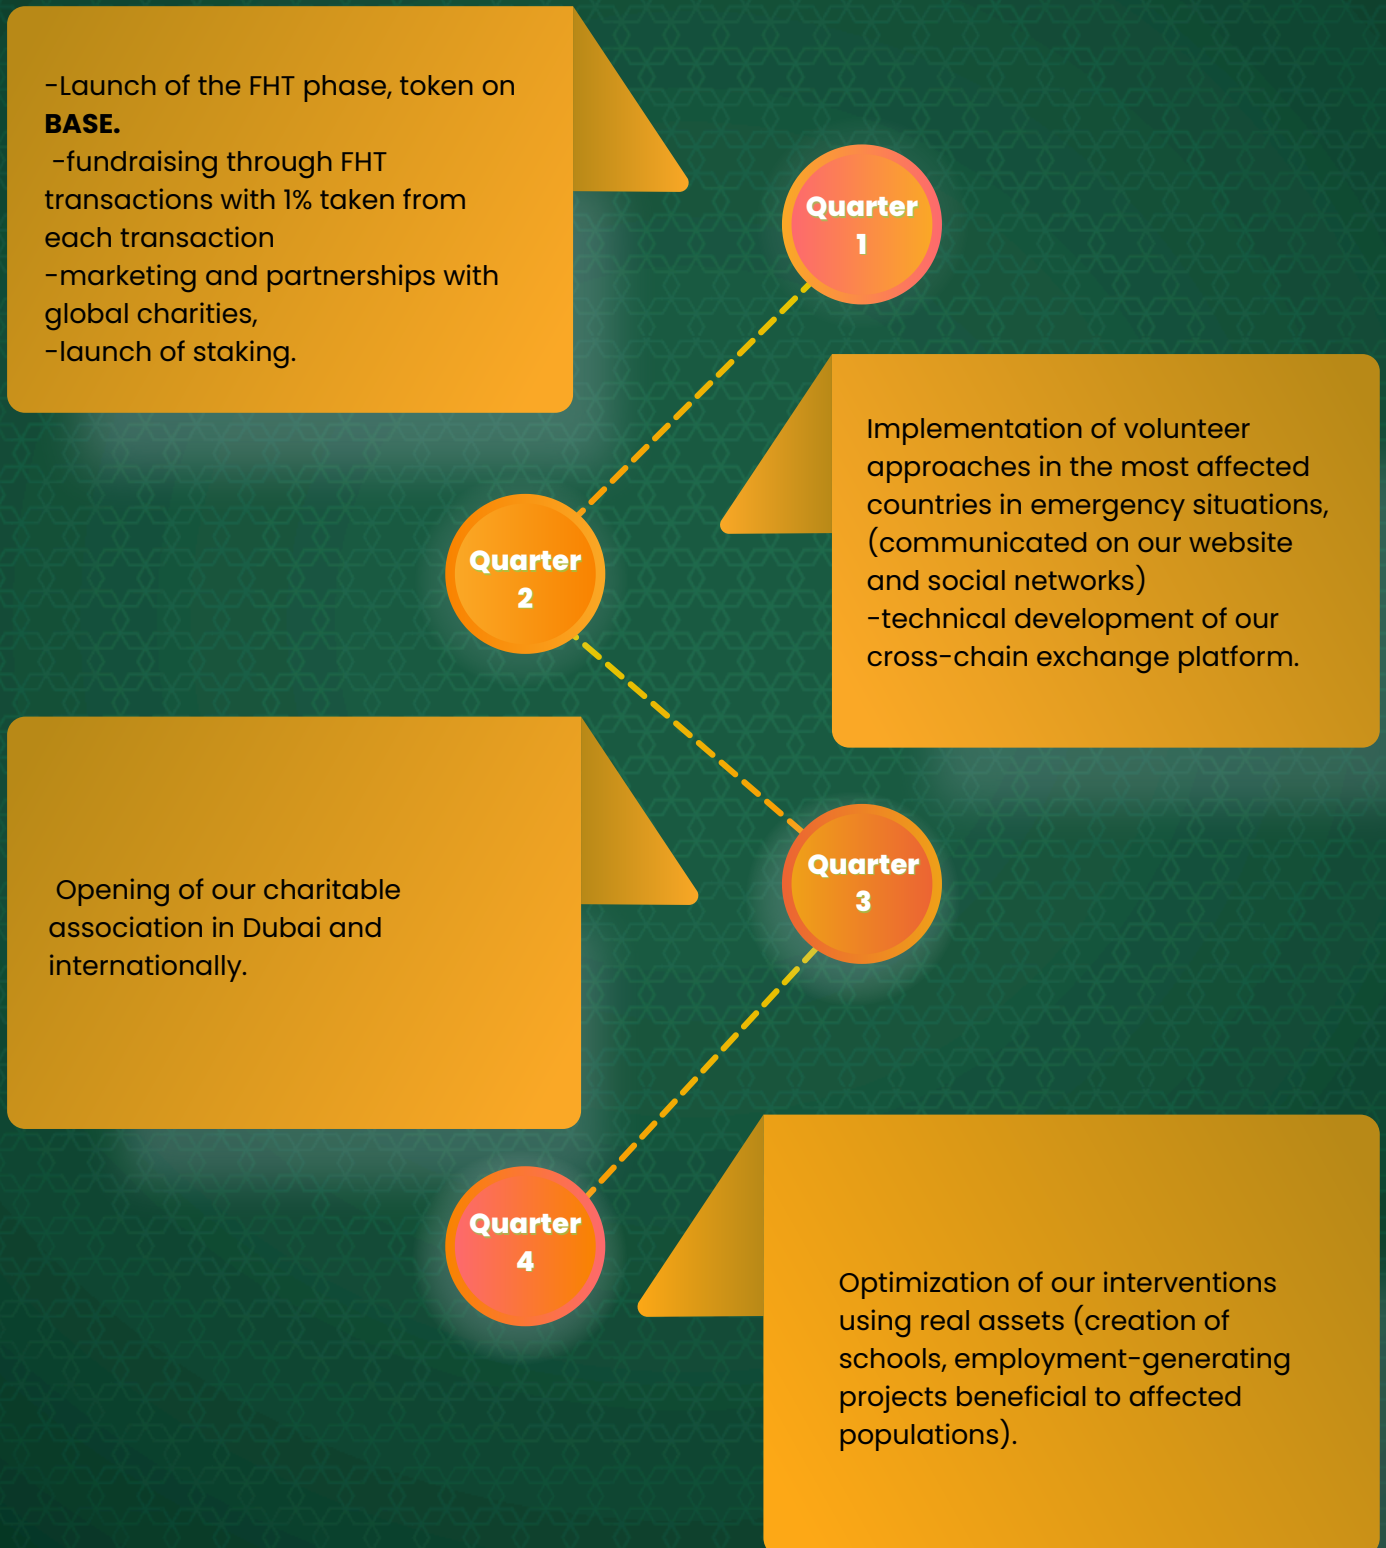

Marketing activities are rewarded as follows:

- 1% of tokens will be distributed one month after the launch,
- 2% of tokens will be distributed two months after the launch,
- 2% of tokens will be distributed three months after launch.
- Regarding charitable initiatives, they will be approved on a case-by-case basis by the project and will not exceed 2% of the tokens allocated per project.
- 1% bonus or airdrops for our loyal contributors

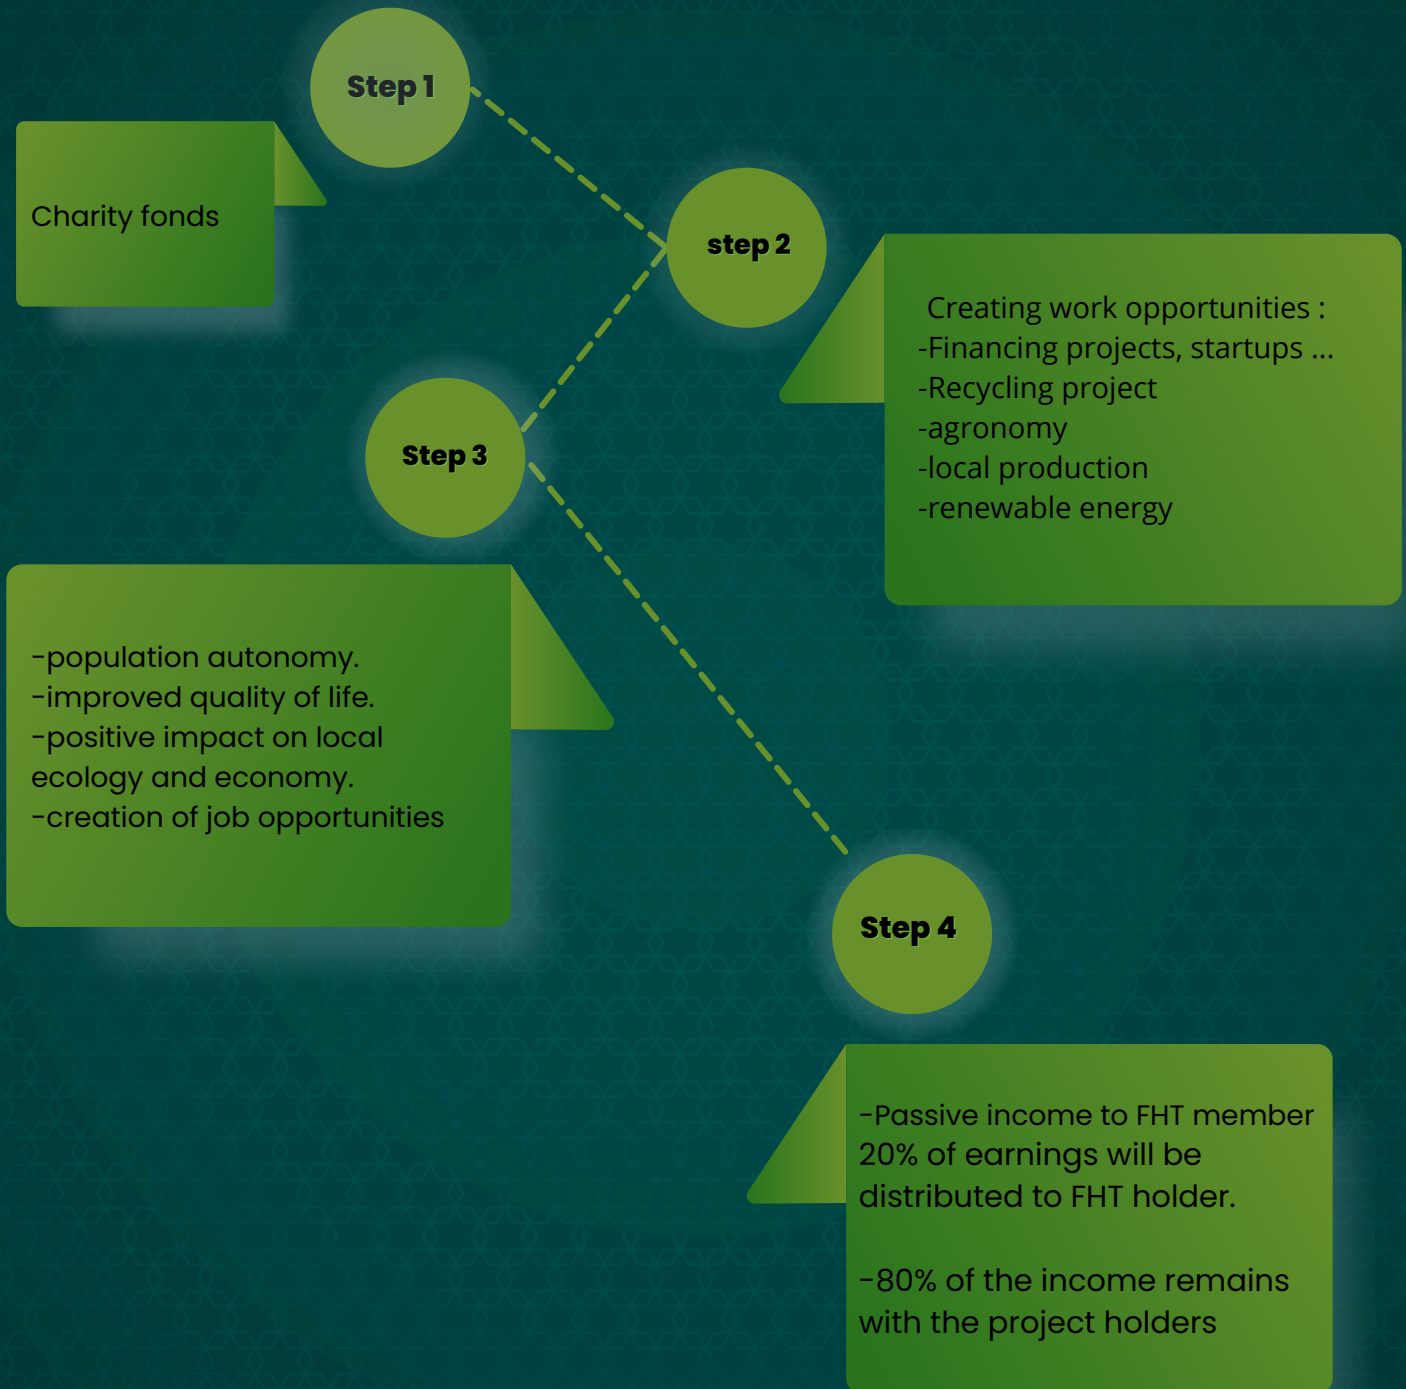

ROADMAP

Our roadmap is recognized for its innovative, intelligent and optimized nature.

ROADMAP RWA

Our roadmap is recognized for its innovative, intelligent and optimized nature.

**Our concept of charity is to create opportunities for people to reintegrate into society and actively participate in our goals.
To have longevity over time**

Our areas of intervention are varied and aim to provide concrete solutions to the most vulnerable populations around the world.

Firstly, we intervene in countries affected by famine and conflict, providing emergency humanitarian aid and implementing development programs to ensure food security and promote peace.

Then, we mobilize in countries affected by natural disasters, providing immediate aid to victims and working with local authorities to rebuild affected communities.

We are also committed to populations affected by pollution, raising awareness of the importance of preserving the environment and supporting projects for depollution and protection of biodiversity.

Furthermore, our ecological approach is reflected in the establishment of tree plantations, the protection of endangered animals and the promotion of sustainable lifestyles.

We also work to improve access to drinking water and technology for isolated populations, by setting up adequate infrastructure and promoting local development.

Finally, we encourage the creation of start-ups and concrete projects offering employment opportunities to disadvantaged people, in order to enable them to escape precariousness and actively contribute to positive and lasting change in their community.

Through our commitment and our action, we aspire to a more just, united and sustainable world for all.

Market research

According to data from the Food and Agriculture Organization of the United Nations (FAO), around 690 million people suffer from hunger worldwide, or almost 9% of the world's population.

According to UN data, every year millions of people across the world are affected by drought, particularly in arid and semi-arid regions. In 2019, for example, more than 45 million people were affected by drought in southern Africa.

As previously stated in the roadmap, by investing in our project, the investor will be able to take advantage of market fluctuations and realize potential gains. In participating in staking and using our interchain swap Dapp, we will be able to collect funds by taking 1% on each purchase/sale of our cryptocurrency. In addition, 10% of the offer will be distributed thoughtfully for each project.

Our advantage lies in the traceability of our actions; each initiative will be shared on our social networks, with short and long term plans aimed at bringing meaningful change to populations. Our collaboration with several associations helps to strengthen this impact.
